

Govern LLMs and AI agents

Get visibility and control over LLMs, AI agents, and agentic browsers

Consumers increasingly use LLMs, AI agents, and agentic browsers to interact and transact online. Brands require new methods to verify agents, assess their intent, and govern automated interactions across digital surfaces. HUMAN Sightline and AgenticTrust work together to provide deep visibility into AI traffic and granular control over AI-driven interactions. They empower businesses to enable valuable agent activities, prevent unwanted scraping, and safely integrate LLMs and AI agents into the customer journey.

With HUMAN:

MONITOR AGENT ACTIONS AND INTENT

DENY SPOOFED, MALICIOUS, OR FRAUDULENT AGENTS

MONETIZE LLM SCRAPERS

STOP UNAUTHORIZED CONTENT SCRAPING

DEFEND AGAINST AGENT-DRIVEN FRAUD AND ABUSE

ALLOW LEGITIMATE AI ACTIONS AND AGENTIC COMMERCE

Benefits

GET FULL VISIBILITY INTO AI TRAFFIC

Clearly understand the behavior, actions, and intent of consumer AI agents, agentic browsers, and LLM bots.

STOP UNWANTED AI SCRAPING

Govern LLM scrapers and crawlers with customizable policies to allow product discoverability while stopping content theft.

ENFORCE RULES FOR AI AGENTS

Allow trusted actions by verified AI agents and agentic browsers, and block malicious, spoofed, or unwanted activity.

Key Capabilities

Monitor LLMs and AI agents.

Get full visibility into LLM scrapers and AI agent activity, including actions, characteristics, and targets.

Monetize scraping traffic.

Stop unauthorized scraping bots and enforce paid access policies for scrapers and LLM agents.

Cryptographic AI agent detection.

Verify AI agents using cryptographic digital signatures that cannot be spoofed.

Fraud and abuse prevention.

Defend against unauthorized scraping, spoofed or malicious, and AI-enabled fraud.

Granular permission management.

Block, allow, or rate limit scraping bots and AI agent actions, such as browsing, logging in, or checking out.

Enable legitimate AI.

Safely enable verified agents and authorized scrapers, turning AI into a trusted source of revenue growth.

“HUMAN helps us protect our content against scrapers while meeting our exemplary standards for user experience by keeping performance high and minimizing latency for our visitors.”

CTO, LEADING TALENT PLATFORM

The Human Advantage

Detection without Blindspots

We verify over 20 trillion interactions weekly across 3 billion devices, connecting global dots to reveal threats others miss across the customer journey.

Intelligence at the Core

Satori isn't just threat intel, it's a team on the front lines. From uncovering global fraud rings to surfacing new attack patterns, every HUMAN decision is powered by real-time insights.

Precision that Performs

>2,500+ signals per interaction. 400+ adaptive models. Decisions in milliseconds. HUMAN turns massive telemetry into high-fidelity decisions you can trust.
