

Protect Online Accounts

Stop account takeover and fraud by bots and humans

HUMAN Sightline uses advanced machine learning, behavioral analysis, and intelligent fingerprinting to detect and mitigate account takeover and fraud across the entire account lifecycle. The solution blocks credential stuffing and brute forcing at login, neutralizes compromised credentials with deep credential intelligence, and remediates breached accounts by continuously evaluating activities within accounts for signs of fraud. User accounts are secured with custom mitigation actions that align threat response with customers' business goals.

Defend Against:

THEFT OF STORED VALUE, INCLUDING ACCOUNT BALANCES, GIFT CARD FUNDS, DIGITAL CREDITS, LOYALTY POINTS, AND AIRLINE MILES

FRAUDULENT USE OF STORED CREDIT CARDS

CREDENTIAL STUFFING AND BRUTE FORCING

DISTRIBUTION OF SPAM, PHISHING, OR MALWARE

THEFT OF STORED PII AND DOWNSTREAM IDENTITY OR FINANCIAL FRAUD

INFRASTRUCTURE STRAIN

Benefits

PROTECT ACCOUNT AUTHENTICATION

Block automated credential stuffing and bruteforcing attacks from getting past the login process.

STAY AHEAD OF ATTACKERS

Render compromised account credentials useless before they can be used in an attack.

CATCH FRAUDULENT ACCOUNT ACTIVITY

Remediate breached accounts early by assessing post-login activity to identify suspicious behavior.

Key Capabilities

Get compromised credentials intelligence

Flag login attempts with compromised credentials using a proprietary, dynamic collection of stolen usernames and passwords.

Verify users without friction

Trusted visitors proceed unimpeded with HUMAN's proprietary low-friction verification challenges.

Get agentic AI visibility and control

Uncover AI agent activity and intent, enable legitimate agents to make purchases for consumers, and prevent unwanted actions.

Uncover hidden threat patterns

Respond faster to threats by identifying large-scale fraud networks, isolating attacker profiles, and tracking changing behaviors.

Customize mitigation responses

Create multi-criteria mitigation policies, including custom responses that work with internal systems and AI-powered rules.

Enable adaptive feedback loop

Integrate your first-party data to optimize detections, react to specific threat adaptations, and tailor the system to your business goals.

"Not only has HUMAN been invaluable at stopping automated bot attacks and helping us improve server performance, but it has also provided significant benefit to my security team, enabling them to spend far less time dealing with malicious bots and instead focus on other business critical areas."

CHIEF INFORMATION OFFICER at Belk

The Human Advantage

Detection without Blindspots

We verify over 20 trillion interactions weekly across 3 billion devices, connecting global dots to reveal threats others miss across the customer journey.

Intelligence at the Core

Satori isn't just threat intel, it's a team on the front lines. From uncovering global fraud rings to surfacing new attack patterns, every HUMAN decision is powered by real-time insights.

Precision that Performs

>2,500+ signals per interaction. 400+ adaptive models. Decisions in milliseconds. HUMAN turns massive telemetry into high-fidelity decisions you can trust.

HUMAN is a leading cybersecurity company committed to protecting the integrity of the digital world. We ensure that every digital interaction, transaction, and connection is authentic, secure, and human. HUMAN verifies 20 trillion digital interactions, providing unparalleled telemetry data to enable rapid, effective responses to the most sophisticated threats. Recognized by our customers as a G2 Leader, HUMAN continues to set the standard in cybersecurity. For more information, visit www.humansecurity.com
