The Human Defense Platform

The Trust Layer for Your Customer Journey

Modular platform offering unmatched visibility and control so real customers, partners, and trusted AI agents can move freely, while fraud and abuse are stopped cold.

The world's leading enterprises trust HUMAN to provide precise threat decisions across advertising and application surfaces. Organizations today are navigating an increasingly complex threat landscape, where agentic AI is changing how customers and systems interact, leading to disjointed security efforts, operational inefficiencies, and compromised customer trust due to gaps in fragmented toolsets. With a modular suite of solutions, built for today's AI-driven landscape, HUMAN allows clients to fine-tune their security posture and fraud prevention with controls tailored to meet their policy and compliance requirements, and build the trust layer their customers expect.

HUMAN's unrivaled visibility generates unique telemetry data at every touchpoint along the customer journey to protect against advertising fraud, sophisticated bot attacks, account fraud and abuse, and client-side threats. By using adaptive machine learning, HUMAN delivers preventative controls that offer unparalleled scale, speed, and decision precision giving your business the confidence to grow and your customers the trust to engage.

Advertising Protection

- Ad Fraud Sensor
- Ad Fraud Defense
- Malvertising Defense
- Ad Quality Defense
- Ad Click Defense
- Page Intelligence
- Brand Safety
- Viewability

Application Protection

- HUMAN Sightline Cyberfraud Defense
- AgenticTrust
- Scraping
- Account Takeover
- Transaction Abuse
- Data Contamination
- Fake Account
- Client-side
- PCI DSS Compliance

Harness the power of one platform for safer ads, interactions, and transactions

ADVERTISING PROTECTION

Safeguard digital advertising with comprehensive purpose-built solutions that give ad tech platforms and publishers control against ad fraud, malvertising, and ad quality.

APPLICATION PROTECTION

Protect web and mobile applications from fraud and abuse, including web scraping, data contamination, transaction abuse, and malicious code injection by third-party apps.

Key Capabilities

Comprehensive Protection
Robust threat protection across multiple attack surfaces, including advertising, applications, and accounts, to protect the entire customer journey.

Modularity
Choose the combination of Human Defense Platform solutions that meet your policy and compliance requirements.

Decision Engine
Unparalleled accuracy based on 2,500 signals that are parsed through 400+ algorithms and adaptive machine-learning models to enable high-fidelity decisioning.

Layered, multi-method protection
Defend against fraud and abuse throughout full user sessions instead of static interaction points, whether driven by bots, humans, or AI agents.

Satori Threat Intelligence
Real-time threat intelligence capabilities to detect and respond swiftly to emerging threats.

Easy Integrations
Remove deployment complexity by leveraging our robust ecosystem of application and architecture partners

The Human Advantage

Detection without Blindspots

We verify over 20 trillion interactions weekly across 3 billion devices, connecting global dots to reveal threats others miss across the customer journey.

Intelligence at the Core

Satori isn't just threat intel, it's a team on the front lines. From uncovering global fraud rings to surfacing new attack patterns, every HUMAN decision is powered by real-time insights.

Precision that Performs

>2,500+ signals per interaction. 400+ adaptive models. Decisions in milliseconds. HUMAN turns massive telemetry into high-fidelity decisions you can trust.

HUMAN Security is the global leader in Agentic Trust, the emerging discipline that informs and governs how humans, bots, and AI agents operate online. For more than a decade we help enterprises, platforms, and digital ecosystems verify digital interactions and establish trust across the entire customer journey — from first ad impression to final transaction. Powered by one of the world's largest behavioral signal networks, HUMAN analyzes over a quadrillion digital interactions each year to distinguish legitimate activity from fraud, abuse, and automated manipulation.
