

Account Protection

Secure Your Online Accounts With Defense In Depth

Account Protection

Account Protection, a component of the Human Defense Platform, provides organizations with comprehensive security for their online accounts, minimizing security breaches and incidents of fraud. It combines pre-, at- and post-login defenses to neutralize account takeover attacks (ATO), fake account abuse and compromised accounts before bad actors can exploit them.

HUMAN's tiered offerings allow customers to select one or multiple solutions to solve the challenges facing their web and mobile applications.

ACCOUNT TAKEOVER DEFENSE

Stop automated ATO attacks and stolen credentials at the account perimeter

COMPROMISED ACCOUNT DEFENSE

Remediate accounts that have been compromised by bad actors

FAKE ACCOUNT DEFENSE

Neutralize fake accounts created by fraudsters to abuse apps and websites

HUMAN CUSTOMER

“We seamlessly integrated HUMAN at our platform edge [AWS CloudFront] to ensure maximum protection against automated bot attacks, but also to minimize latency.”

ALAN MURRAY,
Senior Director, Architecture

Key Capabilities

Block sophisticated bot attacks:

HUMAN uses behavioral analysis and machine learning algorithms to detect advanced bots capable of evading traditional defenses

Employ preventative security:

Minimize the risk of attackers gaining a foothold by pre-emptively neutralizing stolen account credentials

Stop fake account abuse:

Prevent fraudsters from mass creating fake accounts that are used to exploit organizations' apps and websites

Monitor the account lifecycle:

Secure accounts from registration through post-login account usage, identifying unwanted and suspicious activity wherever it occurs

Enforce decisions effectively:

Customize mitigation actions that allow you to react quickly and decisively to threats in a manner that integrates with your organization's workflow

Single pane of glass management:

Manage all your HUMAN solutions from one console. It's easy to see key details, edit policies, and share knowledge

Benefits

REDUCE THE ATTACK SURFACE

Stop bad actors exploiting stolen credentials in account takeover attacks.

SECURE THE ACCOUNT PERIMETER

Block automated credential stuffing and bruteforcing attacks, stopping attackers bypassing the login process.

MONITOR ACCOUNT ACTIVITY

Continuously monitor account activity for anomalous behavior, neutralizing fake and compromised accounts.

The Human Advantage

Scale

We verify more than 20 trillion digital interactions weekly across 3 billion unique devices providing unrivaled threat telemetry.

Speed

Our Decision Engine examines 2,500+ signals per interaction, connecting disparate data to detect anomalies in mere milliseconds.

Decision Precision

Signals from across the customer journey are analyzed by 400+ algorithms and adaptive machine-learning models to enable high-fidelity decisioning.

HUMAN is a leading cybersecurity company committed to protecting the integrity of the digital world. We ensure that every digital interaction, transaction, and connection is authentic, secure, and human. HUMAN verifies 20 trillion digital interactions, providing unparalleled telemetry data to enable rapid, effective responses to the most sophisticated threats. Recognized by our customers as a G2 Leader, HUMAN continues to set the standard in cybersecurity. For more information, visit www.humansecurity.com
